

# VideoSplitter Application

## About

**VideoSplitter** is an app designed to let you easily retrieve images from .MP4's and AVI's. It's perfect for splitting your latest Vine, Instagram or any other video for that matter for the pictures!

## Requirements

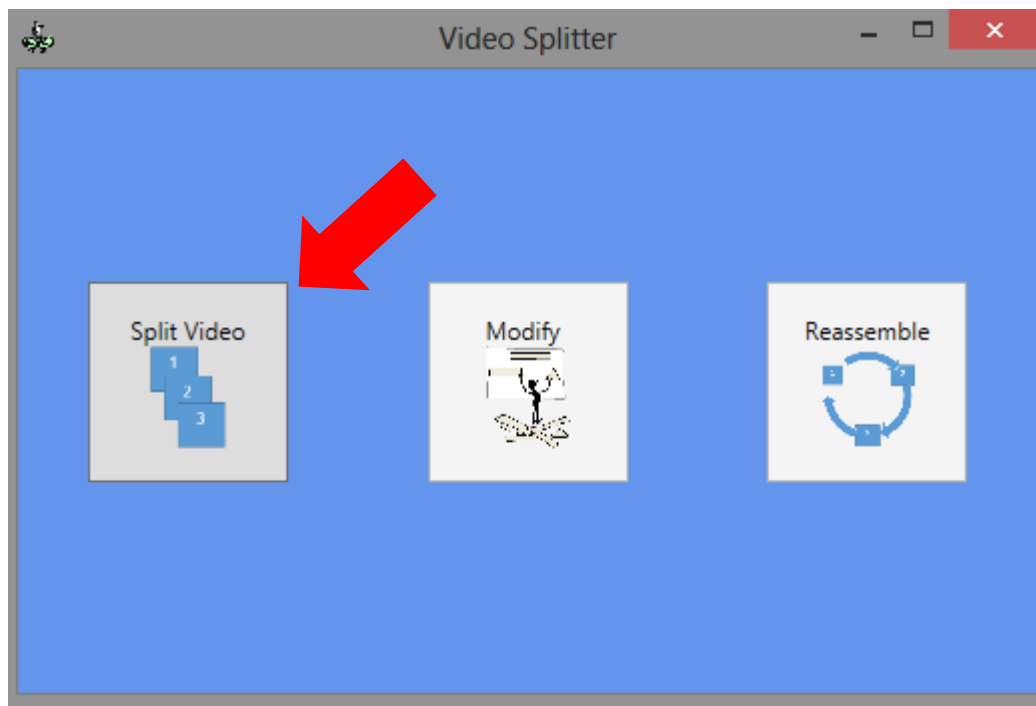

Windows XP or above. Microsoft .NET 4 Framework

Currently supports .MP4 and AVI film.

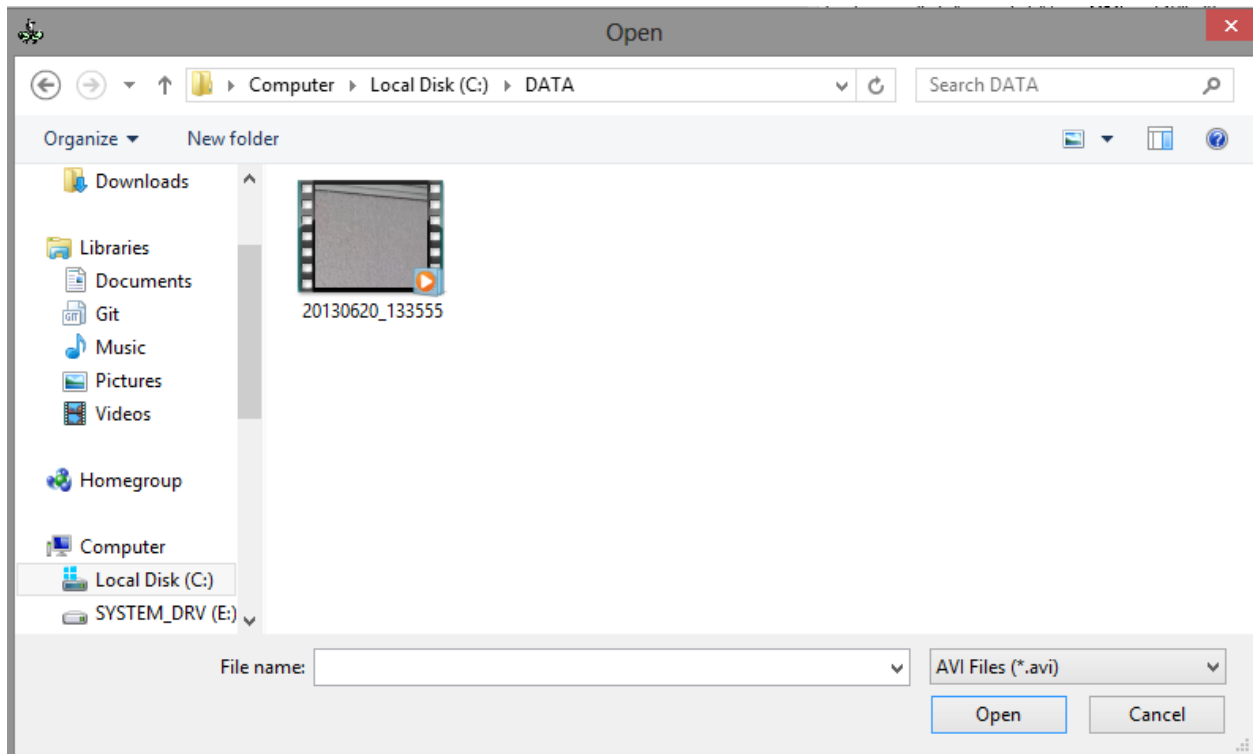

## Usage

**Step 1.** Install the app from here - <http://50.137.137.79/VideoSplitter/>

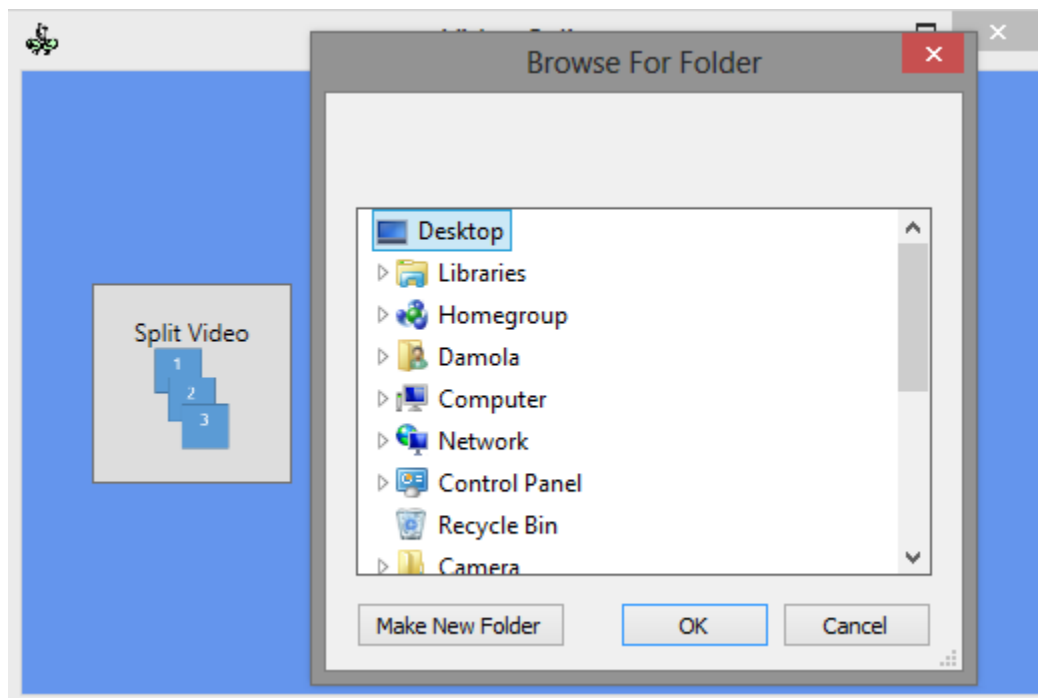

**Step 2.** Start the app and select "Split Video"

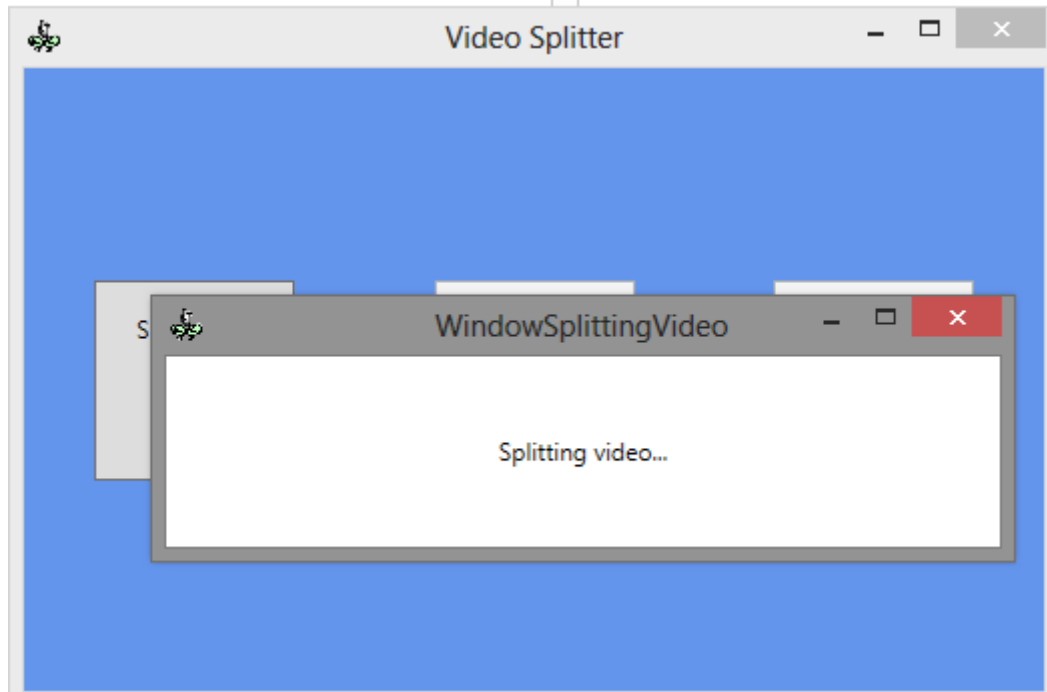

### Step 3. Select your video from the “Open File Dialog”

### Step 4. Select where you want your images to go

**Step 5. VideoSplitter works its magic!**

**Step 6. Enjoy! Modification and reassemble capabilities coming soon!**
